

The Power Lantern Jackpot Trade (It's all about physics and Geometry)

Finally! You can learn how to Generate Income without stress by trading Nifty Future in less than three minutes- No Experience Required.

Get rid of frustrating analysis and fear of losing money with an excel based system that gives you trade without any Analysis.

You will learn

- How to the get success in trading without everyday trading stress
- Discover the number one thing you can do to rid of losing money while (High accuracy and Low Risk compared to Reward)
- Less Trade, Less Stress, More Income
- Say goodbye to any form of analysis that is frustrating and time-consuming
- Have you spent hours in your trading? It takes only 2 min of your daily routine at 9:30 AM, and you are done for the day

Dear Friend

I want this short article to be the most impactful one you will ever read while searching for a full-proof trading solution that ensures a stress-free proven trading solution that works.

Something helps you free from money worry, grow your wealth, gain financial freedom and build a legacy.

I want you to look back at this and someday say that this was the most important article you've ever read in your life.

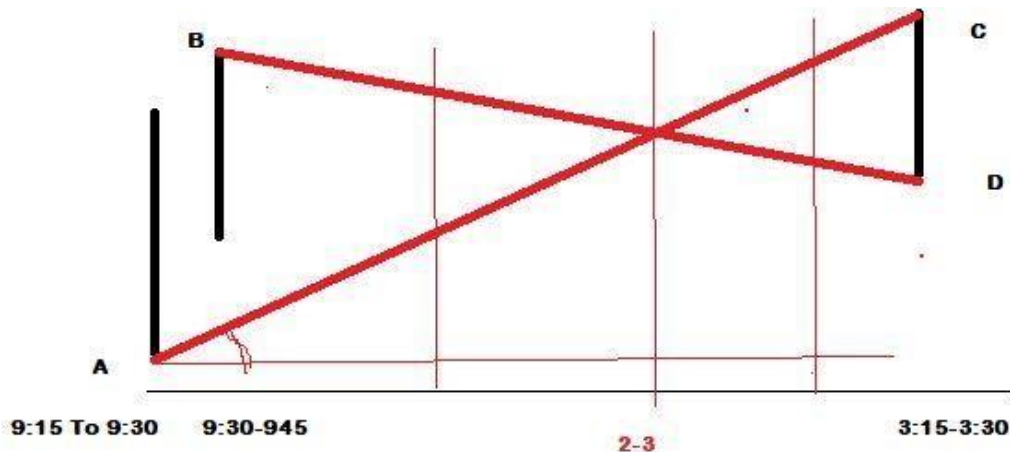

I know that is a strong statement but let me tell you why. Years ago, I formulated an excel based tool that changed all my trading results and changed my life. I went from a struggling trader who hated trading to success.

And it was all from learning and practicing the simple calculation that needs just an old spreadsheet, a simple EXCEL. I want to teach you today.

We will discuss the Following topic t.oday

1. The Power Lantern Jackpot Trade
2. What is the performance so far?
3. How to use the Excel

The Power Lantern Jackpot Trade

In this diagram, let's say A and B are the first two 15 min candle, and C-D is the last 15 min candles for the day

If you notice, you will find it easy that A and B are the two Low and High points of the first two candles and C is the high, and D is the low of the last candle

1. If you connect point A to Point C with a line (the red line) and point B to D, you will find a cross somehow between the day.
2. At point A, we have an angle.

Now notice the following key points here

- A. The cross can happen anywhere between the day based on the length of the candle and the distance between the first candle and the last one- This cross point of the day I found is the best measure to identify the day's volatility.

So, the Placement of the cross would determine the volatility.

- B. The angle at point A will determine the market's trendiness, whether the market is strong or not.

Based on these two factors, the Excel "The Power Lantern Jackpot Nifty Trade_2.10 finds the market's trendiness likely to be in the next day.

You may wish to get the Excel part of the master class, where you can learn the Power Lantern Jackpot Trading strategy and another three strategies you can use in your profitable trading in the Sunday Trading master Class.

Plus, you can check on your own how this strategy has performed.

How to use Excel?

The use of excel is straightforward; here are the details instructions.

Step 1: Every Day After Market Close Enter the following data as mentioned below

Data	Candle Period	Input Cell
High and Low	9:15 To 9:30	B5 & C5

	9:30	
High and Low	To	D5 & E5
	9:45	
	3:15	
High and Low	To	F5 & G5
	3:30	

Step 2: If Cell C to F 10 Say "Yes" Then Trade on Breakout of Next day 1st 15 Minute Candle

Step 3: If Cell C to F 10 Says "No Try Next Day," you have no trade for the Next day
